

Magnus Gertonson

SUMMARY

Up and coming Computer Science student. Looking to further technical skills so I can best help at your company. Eager to better understand client projects.

EDUCATION

Bachelor of Computer Science
Saint Xavier University,
Expected Graduation Date:
8/22/2026

Courses taken

Software Engineering

2026S

I worked to design and implement a real world project

Computer Systems and Organizations

2025S

I was introduced to the internal architecture of computer systems, assembly, and high level languages, worked on assembly programming.

Data Structures and Algorithms

2024F

I began exploration of object-oriented techniques. In particular, I examined linked lists, graph representations, trees, stacks, queues, and hashing.

RELEVANT SKILLS

Technical Skills

- Languages: Java, Javascript, SQL
- Frameworks: Node.js
- Tools: Git

Projects

1. Reviews system

- A system where users can create, edit, and delete product reviews
- **Technologies used:** Javascript, Node.js, Express, MySQL, HTML, APIS, multer

What I built:

- Built dynamic frontend components that load product reviews, calculate average ratings, and support filtering by rating.
- Implemented image upload support using multer.

2. Shopping cart system

- a shopping cart feature that allows users to add, update, and remove products
- **Technologies used:** Javascript, Node.js, MySQL, HTML

What I built:

- Develop the API supporting the operations
- Create a dynamic cart interface that updates quantities, totals, and item counts in real time with Javascript and API calls
- Implemented backend SQL logic to track cart items per user and ensure accurate pricing, product availability, and secure data handling
